

BOP WOOD
Chair & Bar stool
By Knudsen Berg
Hindenes

FACTS

OFFECCT

PRODUCT INFORMATION

Bop is a series of chairs developed by Offecct in collaboration with Norwegian design bureau Knudsen Berg Hindenes. Originally, Bop was designed for USF Verftet, an arts arena for music, theater, film and modern art in Bergen, Norway. USF was established in 1993 and is an important actor within arts and culture in Bergen and Norway with the aim of collaborating, strengthening and participating in the development of culture and creativity. The chair has since then further developed and is available with elegant wooden legs stained in whitepigmented oak. 2016 Bop Wood became a serie with a bar stool. Also that one with legs in massive wood. Bop lives up to the high standards of comfort, durability and adaptability required of a concert chair, but fits perfectly well in other public interiors as well.

"When we were redoing the cultural center and creating a larger concert hall we wanted a new concert chair. The development has been a close process between us here at the cultural center, the designers and Offecct", says Jon Tvilde, head of the cultural center.
